

PREFACE

The Primary mandate of the Ministry of Rural Development is Rural Poverty Alleviation. 1980-81 was crucial year where dedicated Poverty Alleviation Programmes like the IRDP, NREP and the NRLEGP were launched for the poor people residing in the rural area. These programmes were formulated with an objective to ensure employment to earn wage or to develop skills to earn a living thereby, providing the poor with a means to attain a decent livelihood.

The issue to identify the poor from the non-poor in this context was to create a data base called the Below Poverty Line Baseline Survey of the poor, based on the status of income, calorie intake and poverty holdings of each individual family of a village. The national poverty index then was determined and accordingly, the classification of POOR were determined on the individual family total earnings of a calendar year. The families falling below the determined category was then declared as a BPL family.

For this purpose the Base Line Survey BPL was conducted for the first time in 1986 taking the family's annual income of Rs. 0-3500 as Below Poverty line. The rural families whose annual income from all sources was Rs. 3500 and below were considered as BPL families. In 1989 to 1990 the BPL was assessed based on the consumption of 2400 calories per head per day in rural areas. In 1991-1992 a rural household with an annual income of Rs. 11,000 and below were placed under BPL category. The criterion was further raised to Rs. 20000 in 1997-98.

In 2002 the definition of BPL was revised and based on landholding, type of dwelling, clothing, food security, hygiene, capacity of buying commodities, literacy, minimum wages earned by a household, means of livelihood, education of children, debt, migration etc. calculated in terms of SCOREs. The numerical calculation of the above are converted into sources from 0-52. The rural families whose economic scores were 0-32 were eligible to be categorized as a BPL.

During 2002, the State of Nagaland with a total rural household of 2,63,129, this survey has identified 1,63,786 rural families still living under the below poverty line. The BPL percentage for the State of Nagaland is 62.24%.

This BPL census of 2002-03 holds good for all poverty related activities of the State. I hope this survey will be important in its entire aspects in our Endeavour in alleviating the status of the poor people of the State.

(METSUBO JAMIR)
Director
Rural Development,
Nagaland, Kohima
